1st Symposium of FOCIS Center of Excellence PAn’THER
Autoimmunity and cellular immunotherapy of cancer
under the auspices of
association de recherche sur les pathologies du système immunitaire

March 17th 2022
Amphi 110 – Bâtiment Stewart – UFR Santé - Rouen, France

9h15-9h30 Welcome and introduction to the symposium
Catalina Abad (PAn’THER FCE, Rouen, France)

9h30-10h00 Strategies to explore and improve CAR T cell reactivity
Gaëtan Riou (PAn’THER FCE, Rouen, France)

10h00-10h30 Strategies to enhance T cell and CAR T cell therapies in hematological malignancies
Monica Guzman (Weill Cornell Medicine, NY, USA)

10h30-11h00 New tolerogenic strategies in organ transplantation and autoimmunity
Ignacio Anegon (Inserm UMR1064, Nantes, France)

11h00-11h30 Development of an anti-inflammatory and regenerative immunotherapy in stroke: targeting of the neurovascular unit with CAR-Tregs
Olivier Toutirais (Inserm U1237, Caen and PAn’THER FCE, Rouen, France)

11h30-12h00 Understanding the effects of B-cell targeted therapies in pemphigus
Pascal Joly (PAn’THER FCE, Rouen, France)

12h00-14h Lunch break

14h-14h30 Myositis – from morphological aspects to functional defects
Werner Stenzel (Berlin, Germany)

14h30-15h00 Myositis insights from transcriptomic analyses of muscle tissue
Andrew Mammen (Bethesda, USA)

15h00-15h30 Oxidative stress and inflammation in a mouse model of myositis
Catalina Abad (PAn’THER FCE, Rouen, France)

15h30-16h00 Complement-targeted therapies in immune-mediated necrotizing myopathies
Olivier Boyer (PAn’THER FCE, Rouen, France)

16h00-16h15 Closing remarks
Olivier Boyer (PAn’THER FCE, Rouen, France)

Registration is free but mandatory at https://irib.univ-rouen.fr/index.php?info=forms&id=17
Lunch break is included

with the kind support of
